\*Please remember: When you are outside, you are often a guest in the home of wild creatures. They have important things to do like get food, raise young, and avoid predators. Just like in any home—put things back where you found them, be careful what you touch, and pay close attention to see what you can learn about those that live there. Also, always check for ticks after spending some time outside. They are so happy to see you; they might just get attached!
